OBJECTIVE

Motivated and detail-oriented Web Developer with strong skills in HTML, CSS, JavaScript, and the MERN stack. Looking for an entry-level role to build dynamic, responsive web applications while contributing to innovative development teams and continuously enhancing full-stack capabilities.

SKILLS

Languages	HTML, CSS, JavaScript, Java,Python
Frameworks/Libraries	React, Tailwind CSS, Node.js
Tools	MongoDB,Git
Soft Skills	Problem Solving, Debugging, Adaptable, Time Management

PROJECTS

Salon Appointment Booking. (React)

Designed and developed a full-stack salon appointment booking application using React (Vite), Node.js, Express and MongoDB, allowing real-time booking management and seamless user experience.

- Implemented secure user authentication and authorization using JWT, allowing role-based access for customers.
- Built a responsive mobile-friendly user interface with Tailwind CSS, ensuring accessibility across all devices.
- Developed RESTful APIs for user registration, appointment scheduling, and salon service management with robust backend logic.

CERTIFICATE

Software Engineering Virtual Experience Program- Accenture.

- Completed a job simulation covering real-world tasks of a software engineer, including requirements gathering, system design, security and data handling.
- Gained hands-on exposure to agile workflows, real-world problem solving, and collaborative development practices.

EDUCATION

Master of Computer Applications, Gurugram University (8.7 CGPA) 2023-2025

Relevant Coursework: Web technologies, cloud computing, deep learning, OOP using Java, Machine Learning

Bachelor of Science , Gurugram University (7.6 CGPA) 2020-2023

LEADERSHIP

- Organized and led a successful college Holi Fest attended by 500+ students, ensuring smooth coordination, logistics, and an engaging cultural experience.
